Project Name	Smart farmer-IOT Enabled smart farming application

The screenshot displays the IBM Cloud dashboard interface. At the top, there's a navigation bar with the IBM Cloud logo, a search bar, and links for Catalog, Manage, and My IBM Account. Below this, the main dashboard area is titled 'Dashboard' and features a grid of service tiles. These tiles represent different IBM Cloud services, each with a brief description, a 'Getting started' link, and a status indicator (e.g., 'Getting started', 'Recommended', 'Getting started'). The services include Build, Monitor your resources, Use Watson Studio, Get started with Watson Studio, Create an OpenShift cluster, Detach the entire catalog, Payable IBM Analytics Pipeline, Review, select, and create a database, API Connect, Create a Kubernetes cluster, and Set up a new service. The bottom section of the dashboard is divided into three main areas: 'News' (featuring a 'IBM Positioned as a Leader in Gartner® Magic Quadrant™' article), 'Recent support cases' (showing a 'Recent support case' tile), and 'Planned maintenance' (showing a 'Planned maintenance' tile). The rightmost section is titled 'IBM Cloud status' and features a world map with a 'No issues' status indicator. The overall layout is clean and professional, with a dark theme and clear navigation options.

The screenshot shows the IBM Cloud Account settings interface. On the left is a navigation sidebar with links like Account, Resource groups, Cloud Foundry logs, etc. The main area has three columns:

- Account settings:** Displays account details such as Name (US Account), ID, Type (Trial), and remaining trial days.
- Account upgrade:** Promotes upgrading from Play As You Go to Pay As You Go.
- Subscription:** Provides information about billing cycles and offers a link to manage subscriptions.

Below these sections are two more parts:

- Subscription and feature codes:** A section for applying codes, showing a search bar and a table of active codes.
- Financial Services Validated:** A toggle switch to enable or disable financial services validation.
